

**TECHNICAL GUIDE**

**MAGENTO 2  
COMMERCE CLOUD  
MARKETPLACER  
CONNECTOR**

Marketplacer is a global technology SaaS platform equipped with all the tools and feature-rich marketplace functionality needed to build your business a successful and scalable online marketplace, at speed.

**MARKETPLACER™**

The Magento 2 Commerce Cloud Connector allows you to connect an existing Magento 2 solution to the Marketplacer platform utilising a headless configuration.

# MARKETPLACER/ MAGENTO 2 SETUP PROCESS SUMMARY

## 1 MARKETPLACER ACCOUNT

If you don't already have a Marketplacer account, get in touch with the Marketplacer team for a [demo](#).

## 2 TECHNICAL SCOPING

Prior to installation, a Marketplacer Solutions Consultant will conduct a Technical Scoping Workshop to define how your Marketplacer to Magento 2 integrations will work. Outputs from this session includes:

- System architecture
- Integration specification to determine the integrations and how these will work

## 3 FRONTEND DESIGN

Our module is compatible with the default Luma theme. If you have a custom theme or a Luma theme with interface customisations, then you will need to work with a Magento 2 Certified Developer or 3rd party to introduce the concept of the "seller" to your existing page templates.

You will need to make User Interface changes to your existing Magento 2 theme to introduce the concept of a "seller" to your category list, search results, product details, shopping cart and checkout.

## 4 MARKETPLACER CONFIGURATION

Your Marketplacer Customer Success team will be able to support you in generating an API key and configuring your Marketplace.

## 5 MARKETPLACER CONNECTOR INSTALLATION, SETUP AND CONFIGURATION

Installation and setup of the Marketplacer Connector is best completed by a Magento 2 Certified Developer or 3rd party that is familiar with installing and configuring Magento 2 modules.

## 6 TEST & DEPLOY

Your Marketplacer Customer Success team will work with you on a quality assurance test plan to ensure your Marketplacer to Magento 2 integration functions as expected prior to full deployment and going live.

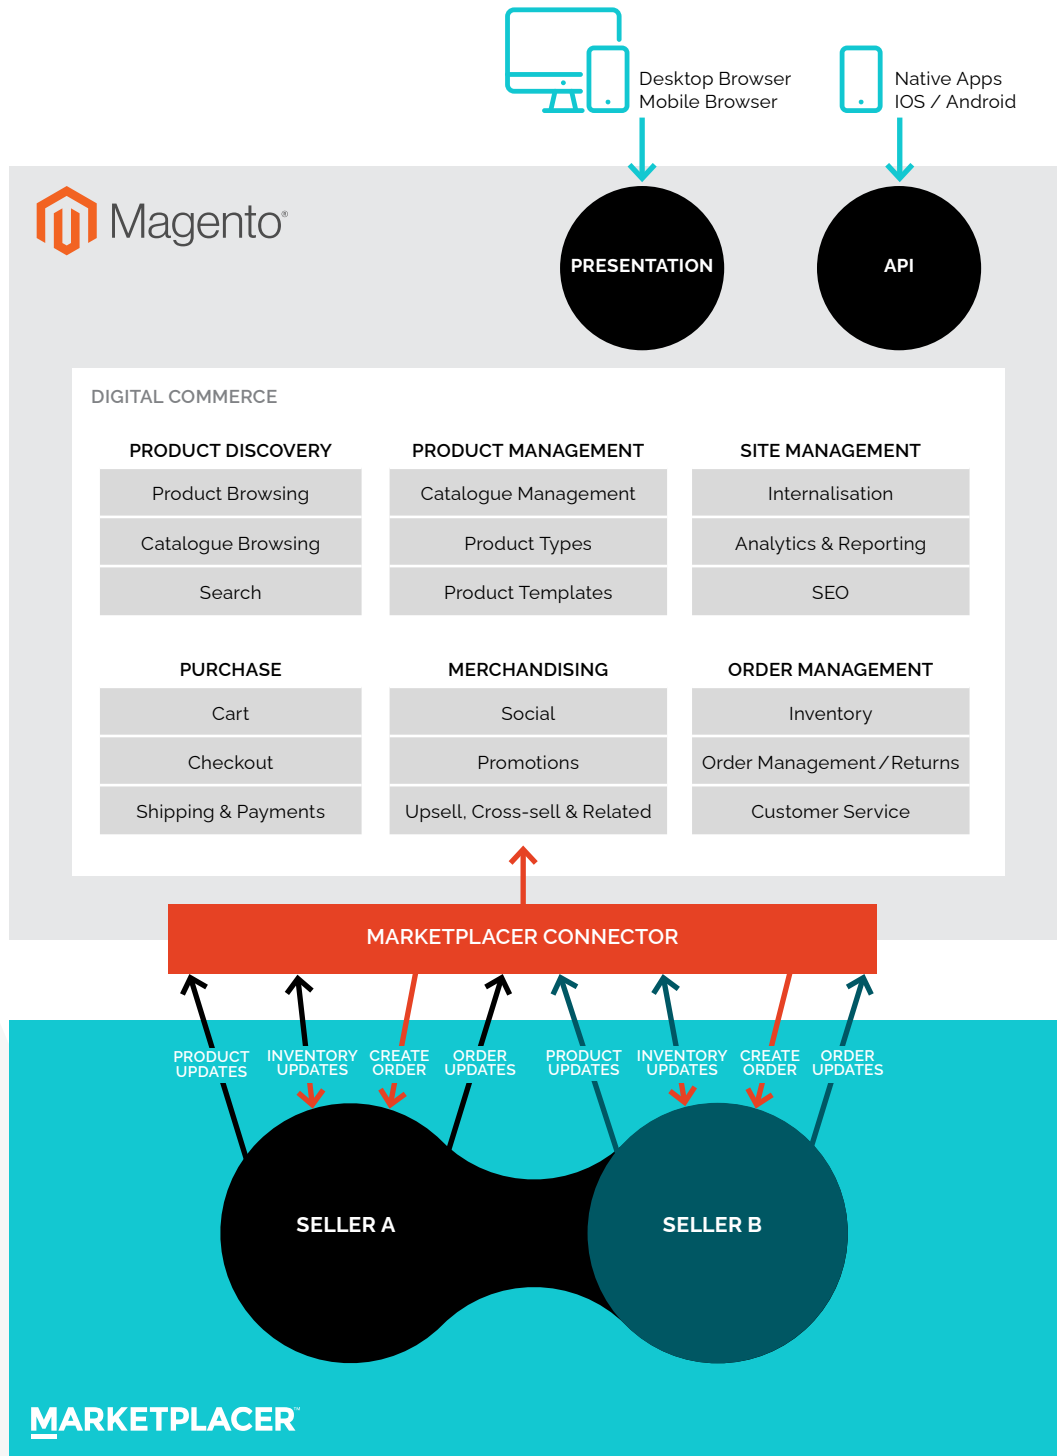

# PREREQUISITES

- 1** The Magento 2 Commerce Cloud Marketplacer Connector is a module compatible with Magento 2 Commerce Cloud v2.4.x and greater.
- 2** Our module is compatible with the Magento 2 Commerce Cloud Starter and Pro editions.
- 3** The Connector is not compatible with Magento 1, Magento 2 Open Source or Magento 2 Commerce OnPrem.
- 4** Our module is compatible with the default Luma theme. If you have a custom theme or a Luma theme with interface customisations then you will need to work with a Magento 2 Certified Developer or 3rd party to introduce the concept of the "seller" to your existing page templates.
- 5** We highly recommend you install the extension to a fully deployed Staging environment and always work in the development branch.
- 6** Ensure you work with a Magento 2 Certified Developer or 3rd party that is familiar with installing and configuring Magento 2 modules.
- 7** You will need to log in to the Magento Marketplace with the username and password you used to purchase the module

## ADDITIONAL NOTES

- The Magento 2 Commerce Cloud Marketplacer Connector module can be installed via Composer within minutes.
- Installation and setup are best completed by a Magento 2 Certified Developer or 3rd party that is familiar with installing and configuring Magento 2 modules.
- You or your nominated 3rd party is responsible for the installation and setup.
